RE: Tank Closure Status for Buildings Nos. 7178 and 7249, Naval
Training Center, Orlando, Florida

Dear Mr. Ugolini:

I have completed the technical review of the above referenced status reports dated March 2, 1998 (received March 4, 1998). Based upon the information that each building was heated with indoor electric space heaters rather than heating fuel and no evidence of ASTs was found, I concur with the recommendation of no further investigation. Should later information indicate that petroleum was used at either building, then a tank closure assessment should be performed.

If I can be of any further assistance with this matter, please contact me at (904) 921-9989.

Sincerely,

John W. Mitchell
Remedial Project Manager
